

VERIFICATION OF COMPETENCY

VOC GUIDELINE

Persons operating plant must be able to demonstrate that they have the necessary competency and skill to safely operate plant machinery on the jobsite within their scope of employment.

To achieve competency the operator must complete a number of questions and practical tasks. Tasks may vary due to environmental constraints and worksite circumstances, but will be relevant to current employment and check relevant skills.

After completing both the Written/Oral and practical assessment, operators will either be found 'Competent' (C) or 'Not yet competent' (NYC)

Once the operator has been deemed competent a Verification of Competency (VOC) card will be issued. Persons may then only operate that particular type of plant. The plant type(s) will be listed on the card.

If you feel you have been unfairly treated, you have the right to appeal the Assessors decision, by speaking to your supervisor or authorised person on site.

This VOC document is for company internal verification of contractors and employees on specific machinery only and is not mapped to RII National Course standards. MSK Resources or its representative has been employed to complete this VOC and is therefore acknowledged as meeting the company's policies around competency assessment in their workplace.

I have read and discussed the assessment results with the Assessor and agree with the overall outcome of the assessment.
